Dedicated to continuous learning and staying updated with industry trends. Passionate about leveraging technical skills to drive innovation and enhance processes.

Skills

- **Programming Languages:** Java, PHP
- **Database:** MySQL, MongoDB
- **Web Technologies:** HTML, CSS, JavaScript
- **Frameworks and Libraries:** Node.js, Laravel, Bootstrap, Express
- **Additional:** Basic hardware and networking knowledge for system maintenance and troubleshooting

Relevant Experience

Full Stack Developer May 2025 – Present

Venturing DigitalIt Pvt Ltd

- Working on full-stack development projects using PHP, Node.js, and modern web technologies
- Developing and maintaining business applications with focus on scalability and performance

PHP Developer Intern September 2024 – October 2024

X-way Designs

- Completed 45-day intensive internship focusing on PHP development
- Gained hands-on experience in web application development and best practices

Education

- **Master of Computer Applications (MCA)** 2023 – 2025
Netaji Subhas University, Jamshedpur
- **Bachelor of Science (Mathematics)** 2020 – 2023
Kolhan University
- **XII (PCM)** 2017 – 2019
Karim City College, Jamshedpur, Jharkhand
- **X (JAC Board)** 2016 – 2017
Amar Jyoti School

Projects

VM Academy – Education & College Management Platform [View Project](#)

Technologies: PHP (Laravel), MySQL, React.js, REST APIs

- Developed a comprehensive education management platform for managing colleges, courses, admissions, students, enquiries, and institutional information
- Built modules for college and course management, including departments, faculty, eligibility criteria, admission details, cut-offs, scholarships, and course content
- Developed admission and enquiry management functionality to capture, manage, and track student applications and admission-related data
- Implemented recruiter and enterprise modules to manage organizations, recruiter information, candidate-related data, and recruitment workflows
- Developed role-based admin panels with controlled access for managing different modules and users
- Built REST APIs and backend services for seamless communication between the frontend and backend systems
- Implemented notification and content management modules for publishing college updates, announcements, news, articles, and other institutional information

- Worked on database design, migrations, API integration, validation, authentication, and performance optimization
- Developed reusable and scalable components to support multiple educational institutions and enterprise users on the platform

SA Pro – Oil & Lubrication Management Software

Technologies: PHP (MVC), MySQL, Bootstrap

- Developed comprehensive business suite for oil and lubrication companies to track inventory, batches, purchases, sales, and compliant invoicing
- Implemented product and batch tracking system with minimum and maximum stock alerts for inventory management
- Created purchase orders, GRNs, sales orders, and GST-compliant invoice generation module
- Built vendor and customer management system with pricing tiers and discount functionality
- Developed role-based access control system for Admin, Store, and Accounts personnel
- Integrated real-time reporting features including stock ledger, sales analysis, aging reports, and profitability metrics
- Implemented CSV import/export functionality and printable document generation
